FIRST THINGS FIRST

THE README FILE

The RollerCoaster Tycoon® 2: Wacky Worlds™ CD-ROM game contains a ReadMe file, where you can view both the License Agreement and the updated information about the game. We strongly encourage you to take the time to read this file in order to get the benefits of the changes made after this manual went to print.

To view this file, double-click on that ReadMe file in the Wacky Worlds directory found in your hard disk (usually C:\Program Files\Infogrames\RollerCoaster Tycoon 2C:\Program Files\Infogrames Interactive\Wacky Worlds). You can also view the ReadMe file by first clicking on the Start button on your Windows® taskbar, then on Programs, then on Infogrames Interactive, then on Wacky Worlds, and finally on the ReadMe file item.

SYSTEM REQUIREMENTS

You absolutely must have the original RollerCoaster Tycoon 2 CD-ROM game already installed on your computer!

Wacky Worlds is an add-on to that game, and cannot run independently of it. If you have RollerCoaster Tycoon 2 installed and running, then you need not worry about most of the following requirements. You already have them all, or the game wouldn't run. The exception is the drive space; Wacky Worlds takes up a little extra.

Operating System:	Windows® 98/Me/2000/XP
Processor:	Pentium® II 300 MHz or equivalent
Memory:	64 MB RAM (128 MB RAM recommended)
Hard Disk Space:	150 MB Free (200 MB recommended)
CD-ROM Drive:	4X Speed or faster (8X recommended)
Video:	DirectX 8.1 or higher compatible Windows® 98/Me/2000/XP-compatible video card*
Sound:	DirectX 8.1 or higher compatible Windows® 98/Me/2000/XP-compatible sound card*
DirectX®:	DirectX® version 8.1 (included) or higher

* Indicates device should be compatible with DirectX® version 8.1 or higher.

SETUP AND INSTALLATION

NOTE: You must have the original RollerCoaster Tycoon 2 CD-ROM game installed on your computer in order to install and play RollerCoaster Tycoon 2: Wacky Worlds.

1. Start Windows® 98/Me/2000/XP.
2. Insert the RollerCoaster Tycoon 2: Wacky Worlds CD-ROM game disc into your CD-ROM drive.
3. If AutoPlay is enabled, a title screen should appear. If AutoPlay is not enabled, or the installation does not start automatically, click on the Start button on your Windows® taskbar, then on Run (Windows® XP users may need to click on the Start button on the Windows® taskbar and then select My Computer from the Start menu). Type D:\Setup and click on OK.

Note: If your CD-ROM drive is assigned to a letter other than D, substitute that letter.

4. Follow the remainder of the on-screen instructions to finish installing the RollerCoaster Tycoon 2: Wacky Worlds CD-ROM game.
5. Once the installation is complete, launch RollerCoaster Tycoon 2 as you normally would – the Wacky Worlds expansion pack scenarios will appear in the same areas as RollerCoaster Tycoon 2 scenarios, but will start with “WW.”

Note: You must have the RollerCoaster Tycoon 2: Wacky Worlds game disc in your CD-ROM drive to play.

SAVING AND LOADING

Saving and loading the games and the rides in Wacky Worlds is exactly the same as saving and loading games and rides in RollerCoaster Tycoon 2. Please refer to the manual of RollerCoaster Tycoon 2.

Climb aboard and discover all the great new things we've made for you to play with this time. More hours of thrilling amusement park fun are right at your fingertips!

WHAT'S NEW

RollerCoaster Tycoon 2: Wacky Worlds contains 17 new scenarios oin seven continents that you can explore at your own pace. It also includes new rides and shops — but we'll let you find those on your own! Here are the brief descriptions of the continental challenges that awaits you in Wacky Worlds:

AFRICA

DAM DEVELOPMENT/WATERFALL

A dam has been built that offers abundant and, cheap hydroelectric power with which to run a park. The park value needs to reach \$350,000 within four years to help repay the cost of building the dam.

DIAMOND MINE

You have inherited an abandoned diamond mine, and find a diamond worth \$10,000. You decide to invest that money to build a world-famous theme park. Your goal now is to receive a rating of 600 and attract 600 guests to the park within two years.

OASIS

A desert oasis has been discovered that provides a beautiful location for a theme park. You'll need to invest extra money to preserve the area as a natural habitat, which means that your park will need to attract 2000 guests within five years.

ANTARCTICA

ECOLOGICAL SALVAGE ICEBERGS

An environmental agency has turned to you to transform an old oil refinery ecological eyesore into a top tourist attraction. You need to return a park value of \$600,000 within five years.

ASIA

JAPANESE COASTAL RECLAIM

An existing park has run out of space. Your only option is to build out into the sea, so you take out a \$10,000 loan. Your park needs to accommodate 2,500 guests within five years and should have rating of 600. Height restrictions on your building are enforced due to foundations / earthquakes risk.

GREAT WALL OF CHINA TOURISM ENHANCEMENT

The authorities have decided to enhance tourism around the Great Wall of China by building a theme park on the adjacent land. You need to attract 800 guests to the park two years after the opening and rating of 700. Money is no object.

MAHARAJA PALACE

You have been commissioned to bring entertainment to the large population around Agra. Build a park inspired by the Taj Mahal. You need to accommodate 1,200 guests by the three-year deadline.

AUSTRALIA

AYERS ROCK

You are helping the Aboriginal people build a park as part of a cultural awareness program. You need to get more than 3,000 guests within three years to educate them in the unique heritage of the Aboriginal people.

FUN AT THE BEACH

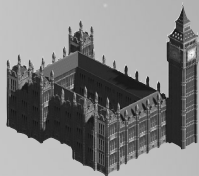

A local entrepreneur's sea life park has gone bust. You already operate a small park and need to raise money to buy another park from the construction company. Do this by developing your own park into a big combined park that attracts 2,500 guests within five years.

EUROPE

EUROPEAN CULTURAL FESTIVAL

You have been brought in to take over a European Cultural Visitor Attraction. You must increase the number of guests to 2,000 in order to pay back the European UnionEU subsidy by the end of the current four-year European parliament term.

RENOVATION

An old park has fallen into disrepair. You gain a European Union grant to return this deprived area to its former glory. You need to renovate the park and replay the grant by generating a park value of \$500,000 within five years.

NORTH AMERICA

ROLLERCOASTER HEAVEN

You are a successful business tycoon on a four-yearlong sabbatical and your plan is to build a park that contains 10 roller coasters of length totaling 30,000 feet and should have excitement rating of 700. You are not constrained by cash concerns.

HAWAII

The people of Hawaii are bored with surfing — you decide to build a park around the mouth of a volcano and hope to attract more than 2,500 people within five years.

GRAND CANYON

You must build a park on the limited land bordering either side of this natural treasure. You have the opportunity to buy neighboring land from the Native American Indians. You need to attract 1,000 guests and have a rating of 600 rating within three years to sustain the local town's population.

SOUTH AMERICA

RAIN FOREST PLATEAU

Space is limited in the precious rain forest, so you must cram as much as possible into the existing clearing. Your objective is to meet a park value of \$200,000 over four years to provide a viable alternative to the local timber industry.

RIO CARNIVAL

You run a small park near Rio, but the bank has called in on your \$2,000 loan. You have just one year to increase your earning capacity to repay this unexpected debt!

INCA LOST CITY

To further boost the local tourism, you must construct a park that is in tune with its surroundings and conforms to height restrictions. You need to attract 1,500 guests and your park value must not drop below \$700 at anytime.

Kirjoita D:\Setup ja napsauta OK. Huomaa: Jos CD-ROM asemaasi tarkoittava kirjain on muu kuin D, kirjoita tähän se kirjain.
